

Fund Objective

The objective of the Fund is to provide capital growth and income over the long term (5-10 years).

The Fund will seek to achieve its objective by investing at least 80% in a concentrated portfolio consisting of the equity securities of approximately 20 to 35 companies based throughout the world which the Investment Manager considers to provide long term returns through capital appreciation and/or the payment of dividends.

The Fund may also invest in collective investment schemes (including those managed and/or operated by the ACD or investment manager) fixed income, money market instruments, deposits, cash and near cash. The Fund is actively managed. The Fund will not have any particular geographic, industry or economic sector focus and as such weightings in these may vary as required.

The Fund may use derivatives only for efficient portfolio management purposes. It is not intended that the use of derivatives for efficient portfolio management purposes will increase the risk profile of the Fund.

Full investment objectives and policies are in the [prospectus](#).

Fund Profile

The portfolio is concentrated, with the number of stocks unlikely to exceed 40.
